Total

50 Marks

Pretend that you are an astrologer and have discovered a new planet in the solar system. Write a letter to the government describing the planet.

*What would the name of it be? What is the meaning of the name?

*What is its appearance, size, climate, temperature, and distance from the sun and Earth? Any other information?

*What makes this planet unique and different from the others?

*Explain the story of how you discovered this planet. Did you become famous? Did others have a hard time accepting your discovery (think of Galileo's experience)?

(Remember to use a letter format !!!
